Labs Domain

The LABS Domain comprised of lab results from three data sources. The main source is PLIS (Provincial Labs Information System) from all labs across the health authorities and some community labs. There are two other lab sources, Power River Hospital (active results) and VCHA Historical (before March 28, 2012). This was the old design.

When the BC Cancer Genomics lab reports from the SHIRE system were onboarded, the CareConnect team redesigned the interface into tabs: 'Provincial LABS' for PLIS and 'Regional LABS' for the other lab sources.
