## **For the Laboratory Services Outpatient**

### **Payment Schedule**

*Fee-For-Service Outpatient Laboratory Services in  
British Columbia*

**Issued October 1, 2015**

**Revised as of December 17, 2024**

Ministry of  
Health

**SCHEDULE OF FEES**  
For the Laboratory Services Outpatient  
**PAYMENT SCHEDULE**

<b>SCHEDULE OF FEES - Table of Contents</b>	<b>Issued: October 1, 2015</b>
---	--------------------------------

**Contents**

1. **HEMATOLOGY AND BLOOD BANK FEE ITEMS ..... 1-6**

2. **MICROBIOLOGY FEE ITEMS ..... 2-12**

3. **CHEMISTRY FEE ITEMS ..... 3-16**

4. **CYTOGENETICS FEE ITEMS ..... 4-28**

5. **VIROLOGY FEE ITEMS..... 5-30**

6. **ANATOMIC PATHOLOGY FEE ITEMS..... 6-32**

7. **OTHER FEE ITEMS ..... 7-33**

**SCHEDULE OF FEES**  
**For the Laboratory Services Outpatient**  
**PAYMENT SCHEDULE**

<b>Introduction to the Schedule of Fees</b>	<b>Issued: October 1, 2015</b>
---	--------------------------------

### **Interpretation**

The Laboratory Services Schedule of Fees is issued under the authority of the Minister of Health and is effective as of October 1, 2015 and updated as necessary. The Schedule cannot be correctly interpreted without reference to the Laboratory Services General Preamble and to the notes contained within the respective sections.

The Schedule of Fees contains the list of fees approved by the Minister and payable to approved laboratory facility operators on a Fee-for-Service (FFS) basis for medically required, insured laboratory services provided to beneficiaries enrolled with the [Medical Services Plan](#) (MSP).

Fee item values are subject to modification by the Minister. These modifications may affect the entire Schedule of Fees or may be specific to certain fee items or groups of fee items.

The notes within each specialty section of the Schedule of Fees provide the billing rules under which the fees are to be claimed and are designed to clarify the use of the Schedule for operators and practitioners.

### **Guidelines and Protocols**

The Minister has adopted by reference, applicable Guidelines and Protocols Advisory Committee (GPAC) [clinical practice guidelines](#) and may also adopt guidelines or protocols established by any person or body.

GPAC is an advisory committee to the Medical Services Commission and has representatives from both the [Doctors of BC](#) and the Ministry of Health.

### **Add-On Tests**

Under certain specified circumstances, laboratories are authorized to perform, and operators to bill for, tests in addition to those specifically requested by the referring practitioner.

### **Fee Items and Billing**

Fee items within this Schedule may contain requirements for additional detail to be provided in the billing note record (e.g. fee item 91075 Allergen specific IGE assay).

## **Asterisk Fee Items**

Certain tests are marked with asterisks (\*) and require consultation as noted below. These are usually complex or costly procedures and require a Laboratory Medicine physician's approval and/or review/interpretation or written report. Asterisks help to identify the Laboratory Medicine physician's additional and individual role related to the use of these specific tests.

### **Single Asterisk (\*) Items**

Fee items with a Single Asterisk (\*) may only be performed and billed on approval of a Laboratory Medicine physician.

While the majority of tests requested by referring practitioners are accepted without modifications, any request may be subject to a Laboratory Medicine physician's approval or alteration based on clinical expertise and/or clinical practice guidelines and protocols. This intervention depends upon many variables, including the patient's clinical condition, prior testing patterns, previous or simultaneously run test results, overlapping requests from multiple practitioners, and the types of tests requested. The Laboratory Medicine physician may consult with the referring practitioner before modifying a test request.

The Laboratory Medicine physician may also review laboratory requests on an individual basis without contacting the referring practitioner. Additional laboratory tests may only be added in the following circumstances: on approval of the referring medical or health care practitioner or by a Laboratory Medicine physician in certain circumstances e.g. to clarify or exclude a diagnostic consideration, or under the provision of protocols approved by the minister.

For audit purposes, documentation (as noted below), is required to show that approval was provided by the Laboratory Medicine physician for the fee items marked with a single asterisk (\*).

### **Double Asterisk (\*\*) Items**

Fee items with a Double Asterisk (\*\*) may require review/interpretation or written report by a Laboratory Medicine physician for billing of the laboratory fee by the operator. Good laboratory practice includes criteria set by the minister as to which tests or test results require such intervention, including direct contact with the referring medical or health care practitioner.

These criteria are usually related to significantly abnormal results, but may also include more complex procedures that require the specialized skill and knowledge of a Laboratory Medicine physician to assist referring medical and health care practitioners in interpretations. However, the specific action taken by the Laboratory Medicine physician in any particular case will vary, based on the clinical circumstances and their professional judgement. For audit purposes, documentation (as noted below) of such activities is required.

### **Triple Asterisk (\*\*\*) Items**

Both the Single Asterisk (\*) and the Double Asterisk (\*\*) requirements are applicable.

The documentation for audit purposes may consist of any of the following:

- a notation or initials on the original requisition (paper or electronic format), or the written or computerized test worksheet;
- Laboratory Medicine physician's notes;
- where two laboratories (a referral and a testing) are involved, it is the responsibility of the testing laboratory to retain all the pertinent documentation available;
- notation on a master worksheet with all relevant results;
- written or computerized signature on the report;
- documentation of consult with the referring physician in a paper or electronic record;

- Laboratory Medicine physician authorization of referring medical or health care practitioners to request particular tests and who are recognized to have expertise in specific clinical area - a list of such authorized practitioners may be maintained by the individual laboratory; or
- any other documentation satisfactory to the minister, retained by the facility operator.

Attention is directed to fee items that specify a certain performance standard. Questions regarding acceptable best practices should be directed to the [Diagnostic Accreditation Program](#) (DAP).

### **Fee Schedule Codes**

- \* May only be performed and billed on approval of a Laboratory Medicine physician
- \*\* May require review/interpretation or written report by a Laboratory Medicine physician for payment of the laboratory fee
- \*\*\* Both single asterisk (\*) and the double asterisk (\*\*) requirements are applicable
- + Blood bank services are not payable by the Minister of Health where available from Canadian Blood Services
- P Designates fee items approved on a Provisional basis and awaiting further review

**SCHEDULE OF FEES**  
For the Laboratory Services Outpatient

**PAYMENT SCHEDULE**

<b>Section One</b>	<b>Hematology and Blood Bank Fee Items</b>	<b>Issued: October 1, 2015</b>
--------------------	--	--------------------------------

**HEMATOLOGY AND BLOOD BANK FEE ITEMS**

	<b>Total Fee \$</b>
90029** Alpha-thalassemia, molecular testing for common defects.....	67.80
<b>Notes:</b>	
i) Maximum of once per patient per lifetime.	
ii) May be billed in addition to 90540 and 90240.	
90035** Anti DNA.....	28.41

**Add-On Tests:** Titration studies may be performed on patients found to have positive antinuclear antibodies (ANA). On patients with moderate to high titres of ANA (i.e., titre ≥ 320, using doubling dilutions), it may be appropriate to perform and bill the follow-up tests, anti-DNA (90035) and anti-ENA (90120), if these have not been performed previously.

90038*** Anti Saccharomyces Cerevisiae (ASCA) – IgA.....	25.47
90039*** Anti Saccharomyces Cerevisiae (ASCA) – IgG.....	20.56
91130** Proteinase 3 Antineutrophil Cytoplasmic Antibody (PR3-ANCA).....	18.90
<b>Note:</b> 91130 in conjunction with 91160 should be used as the front-line tests for ANCA-associated vasculitis.	
91145** Anticardiolipin Ab, IgG.....	24.47
91146** Anticardiolipin Ab, IgM.....	24.47
91160** Antimyeloperoxidase Antibody.....	17.75
<b>Note:</b> 91160 in conjunction with 91130 should be used as the front-line tests for ANCA-associated vasculitis.	
90040*** Antithrombin III.....	33.49
90042*** Anti-Xa Heparin assay.....	94.12
90045** Bone marrow examination.....	225.85
<b>Note:</b> 90045 includes 90465, 90490, 90205, 90340 and 90210.	
90046*** Beta 2 Glycoprotein I (B2GPI) antibody screen.....	44.65
<b>Notes:</b> The following indications for this test include:	
i) Patients with vascular thrombosis – one or more clinical episodes of arterial, venous or small vessel thrombosis in any tissue or organ. Thrombosis must be confirmed by objective validated criteria.	
ii) Patients with pregnancy morbidity:	
a) One or more unexplained deaths of a morphologically normal fetus at or beyond the 10 <sup>th</sup> week of gestation, with normal fetal morphology documented by ultrasound or by direct examination of the fetus.	
b) One or more premature births of a morphologically normal neonate before the 34 <sup>th</sup> week of gestation because of: eclampsia or severe pre-eclampsia defined according to standard definitions or recognized features of placental insufficiency, or	
c) Three or more unexplained consecutive spontaneous abortions before the 10 <sup>th</sup> week of gestation, with maternal anatomic or hormonal abnormalities, and paternal and maternal chromosome causes excluded.	

	iii) <i>Not payable with 90047.</i>	
90047***	Beta 2 Glycoprotein I antibodies IgG/IgM isotype determination .....	47.26
	<b>Note:</b> <i>Not payable with 90046.</i>	
91355	Cell count - CSF and other body fluids.....	28.77
91356	Cell differential – CSF and other body fluids .....	11.70
90050**	Circulating anticoagulant - incubated mixing study using one or more plasma mixtures..	57.43
90055***	Circulating inhibitor screen - unincubated simple mixing study.....	30.54
90065	Cold agglutinins - qualitative.....	14.30
90068	Cyclic citrullinated peptide antibodies .....	29.48
	<b>Notes:</b>	
	i) <i>Payable only if requested by Rheumatologist or General Internal Medicine Specialist.</i>	
	ii) <i>Not payable for established rheumatoid arthritis.</i>	
90070**	Cold agglutinins - quantitative .....	27.40
90072**	Collagen Binding assay .....	52.51
	<b>Note:</b> <i>Not billable with 90505.</i>	
90073**	Dilute Russell Viper Venom Time.....	14.01
90080	Direct antiglobulin (Coombs') test, polyspecific.....	24.55
	<b>Note:</b> <i>Not billable when performed as part of a cross-match procedure. Claim must state specific reason for this test.</i>	

**Add-On Tests:** A direct antiglobulin test (Direct Coombs' - 90080) may be performed and billed when the clinical history or results of a hematology profile or morphological examination suggest increased red cell destruction.

Specific Criteria

Rationale

- |   |   |
|---|---|
| a) <i>Anemia plus clinical history of lymphoma or autoimmune disorder</i> | <i>High incidence of hemolytic anemia</i> |
| b) <i>Morphologic evidence of hemolysis</i>                               |   |

- spherocytes
- RBC agglutination
- polychromasia ≥ moderate or 2+

90085***	Donath-Landsteiner .....	15.00
90095**	Erythropoietin (EPO) assay .....	29.51
90110**	Euglobulin lysis time .....	16.30
90115	Examination for eosinophils in secretions, excretions and other body fluids .....	54.08
	<b>Notes:</b>	
	i) <i>Payable for specimens that require preliminary processing, e.g: cytopspin centrifugation +/- total cell count, before slide preparation and staining.</i>	
	ii) <i>Not payable with 90512, 91355, 91356.</i>	
90120	Extractable nuclear antigens .....	24.99
	<b>Notes:</b>	
	i) <i>Extractable nuclear antigens (90120) is only payable after a positive antinuclear antibody screen by immunofluorescence (90280) or enzyme immunoassay (90281).</i>	
	ii) <i>Not payable with 90121 (Anti-nuclear antibodies, specific detection by multiplex immunoassay).</i>	

**Add-On Tests:** Titration studies may be performed on patients found to have positive antinuclear antibodies (ANA). On patients with moderate to high titres of ANA (i.e., titre ≥ 320, using doubling dilutions), it may be appropriate to perform and bill the follow-up tests, anti-DNA (90035) and anti-ENA (**90120**), if these have not been performed previously.

90121**	Anti-nuclear antibodies, specific detection by multiplex immunoassay.....	38.64
	<b>Notes:</b>	
	i) <i>ANA, specific detection by multiplex immunoassay (90121) is only payable after a positive antinuclear antibody screen by immunofluorescence (90280) or enzyme immunoassay (90281).</i>	
	ii) <i>Payable for procedures that specifically identify the clinically significant anti-nuclear antibodies, i.e. dsDNA, ENAs, histones, and centromere antibodies.</i>	
	iii) <i>Not payable with 90120 or 90035.</i>	
90123***	Factor II Assay (quantitative only).....	53.52
90125***	Factor V (quantitative only).....	52.04

90127***	Factor V Leiden / PGM – 1 <sup>st</sup> gene .....	76.92
	<b>Notes:</b>	
	i) Restricted to Royal Columbian, Vancouver and Victoria General Hospitals, LifeLabs	
	ii) Not billable for screening purposes.	
	iii) Applicable to patients with thrombophilia.	
90128***	Factor V Leiden / PGM – 2 <sup>nd</sup> gene .....	48.53
	<b>Notes:</b>	
	i) Billable only when performed with 90127.	
	ii) Restricted to Royal Columbian, Vancouver and Victoria General Hospitals, LifeLabs	
90130***	Factor VII assay (quantitative only) .....	51.21
90135***	Factor VIII-C assay .....	51.58
90140***	Factor VIII-C inhibitor assay (Bethesda titre) .....	89.64
90145***	Factor IX assay .....	58.08
90150***	Factor XI assay .....	51.21
90155***	Factor X assay .....	51.21
90160***	Factor XII assay .....	51.21
90165***	Factor XIII screen (Fibrin stabilizing factor) .....	16.27
90170	Fibrin/fibrinogen degradation products .....	23.27
	<b>Notes:</b>	
	i) Includes D-dimer	
	ii) Includes quantitative assay or titre	
90175	Fetal hemoglobin .....	18.51
90180	Fetal cell stain .....	19.03
90185	Glucose-6-phosphate dehydrogenase (G-6-PD) screening test .....	42.91
90190***	Glucose-6-phosphate dehydrogenase assay (red cell) .....	59.02
90205	Hematology Profile .....	10.96
	<b>Notes:</b>	
	i) To include automated Hgb, WBC, platelet count, Hct, RBC indices, and differential white cell count when indicated	
	ii) Laboratories will perform a full hematology profile when any of the individual items is requested.	

**Reticulocyte Count**

When a Reticulocyte Count is requested, the Hematology Profile (90205), in addition to the Reticulocyte Count (90490), may be performed and billed.

90210**	Hematology special stains – routine .....	28.76
	<b>Note:</b> Iron, PAS, peroxidase, sideroblast, Sudan black	
90220	Hemoglobin A2 quantification .....	14.14
90225	Hemoglobin-cyanmethemoglobin method, and/or haematocrit .....	3.22
90240**	Hemoglobin electrophoresis .....	29.84
	<b>Notes:</b>	
	i) Also payable for other protein separation techniques based on differences in electrical charge.	
	ii) Not payable with 90220 (Hemoglobin A2) or 90175 (Fetal Hemoglobin).	
90245	Hemoglobin-H inclusion bodies .....	67.80
90265**	H.L.A. - single antigen .....	40.58
	<b>Note:</b> Not for screening purposes.	
90280**	Antinuclear antibodies - immunofluorescence screen .....	20.44
	<b>Notes:</b>	
	i) ANA – IF (90280) should be used as a primary screen.	
	ii) If the result of ANA – IF is clearly abnormal, proceed with appropriate testing for specific antibodies.	
	iii) 90280 is payable only once in a 12-month time period.	
	iv) Anti-mitochondrial antibody (AMA) and anti-smooth muscle antibody (ASMA) should be billed under 90286 (liver autoantibodies (LiAA)).	
	v) Include titre when required.	
	vi) Only payable with 90281 if requested by a rheumatologist.	
90281**	Antinuclear antibodies by EIA .....	16.24
	<b>Notes:</b>	
	i) ANA/ENA ELISA (90281) should be used as a primary screen.	

	ii) If the result of ANA/ENA ELISA (90281) is clearly abnormal, proceed with appropriate testing for specific antibodies.	
	iii) Only payable with 90280 if requested by a rheumatologist.	
	iv) 90281 is payable only once in a 12-month time period.	
90286**	Liver autoantibodies (LiAA), immunofluorescence .....	23.82
	<b>Note:</b> Only one of either 90286 or 90288, not both, are payable for the same sample tested on the same day.	
90287**	Anti-neutrophil cytoplasmic antibodies (ANCA), immunofluorescence screen .....	114.26
	<b>Notes:</b>	
	i) Fee item 91130 Proteinase 3 anti-neutrophil cytoplasmic antibodies (anti-PR3), and fee item 91160 Antimyeloperoxidase antibodies (anti-MPO), are the recommended front-line tests for the diagnosis of ANCA-associated vasculitis. Fee item 90287 may be performed in rare circumstances and is payable only if ordered by a specialist after review of anti-MPO and anti-PR3 results.	
	ii) 90287 is not payable if co-billed with anti-MPO and anti-PR3.	
90288**	Anti-parietal cell antibody (APCA), immunofluorescence screen .....	23.82
	<b>Notes:</b>	
	i) Only one of either 90286 or 90288, not both, are payable for the same sample tested on the same day.	
	ii) Include titre when required.	
90290**	Immunophenotyping by flow cytometry - peripheral blood and/or tissue and/or bone marrow and/or body fluids - 5 tube panel .....	223.42
	<b>Notes:</b>	
	i) Do not count control(s) as separate tube(s).	
	ii) Fee items 90290 and 90295 not payable for CD4 counts in patients with HIV infection.	
90295**	Immunophenotyping by flow cytometry - peripheral blood and/or tissue and/or bone marrow and/or body fluids - each additional tube.....	34.42
	<b>Notes:</b>	
	i) Do not count control(s) as separate tube(s).	
	ii) Fee items 90290 and 90295 not payable for CD4 counts in patients with HIV infection.	
90300	Indirect Coombs (per tube).....	15.05
	<b>Note:</b> Not chargeable when performed as a blood bank service. Claim must state specific reason for this test.	
90305	Infectious mononucleosis - slide agglutination .....	17.10

<p><b>Add-On Tests:</b> A test for infectious mononucleosis may be performed and billed under the following circumstances:</p>
--

- a) Lymphocytosis (>4.0 absolute count) in an adult under the age of 50 years.
- b) Significant numbers of reactive lymphocytes (estimate of >10% of total WBC).

90315	Latex test (rheumatoid factor).....	8.41
	<b>Note:</b> Also payable for immunoassay techniques for the detection and quantification of rheumatoid factor.	
90325***	Lymphocyte stimulation test .....	106.30
90330***	Lymphocyte stimulation test - each additional antigen or mitogen.....	32.16
90335**	Malaria and other parasites .....	61.82
90340**	Marrow films for interpretation .....	163.79
90345**	Marrow or peripheral blood stem cells .....	104.80
90357	Neutrophil Oxidative Burst assay .....	112.77
90365***	Oxygen dissociation curve.....	77.96
90370	Partial thromboplastin time .....	6.57
90375**	Partial thromboplastin time (PTT) substitution test for factor deficiencies .....	42.77
90377**	Phospholipid Neutralization Test – for confirmation of Lupus Anticoagulant .....	42.25
90380	Plasma hemoglobin .....	16.88
90385***	Plasminogen assay .....	45.87
90390**	Platelet antibodies .....	34.46
	<b>Note:</b> 90390 normally may not be billed to the minister when performed as a blood bank service or where available from the Canadian Blood Services. If this service is required on an emergency basis from other than the Canadian Blood Services, the claim must state a specific reason for this test.	
90400	Platelet estimation on film.....	4.64

90405**	Platelet function aggregation (per additive).....	21.93
90420***	Protein C activity.....	51.33
90427**	Protein S activity (clot-based).....	38.31
	<i>Note: Not billable with 90430.</i>	
90430***	Protein S free antigen.....	43.51
90440	Prothrombin time/INR.....	12.07
90450	Pyruvic kinase (PK.) screening test.....	13.30
90465	Blood film review.....	17.99
	<i>Note: As a guideline, the volume of 90465 Blood film review should not exceed approximately 9 percent of the total volume of CBC tests; the minister insures no more than this volume or percentage.</i>	

The criteria for **adding on** blood film review (**90465**) are any one of the following:

**Adult Patients**

**1. RBC Abnormalities**

- a) Hemoglobin <100 or >175 g/L (female)  
<120 or >190 g/L (male)
- b) MCV <75 or >105 fL (male or female)  
<80 or >105 fL (pregnant female)
- c) MCH <27 pg (pregnant female)
- d) RDW >0.22 (male or female)
- e) MCHC >370 g/L (male or female)
- f) Abnormal RBC histogram or flag, requiring verification

**2. WBC Abnormalities:** (criteria apply to male or female)

- Total count <4.0 or >30.0 x 10<sup>9</sup>/L
- Automated Differential Results
  - Neutrophils <1.0 or >20.0 x 10<sup>9</sup>/L
  - Monocytes >2.0 x 10<sup>9</sup>/L
  - Lymphocytes >5.0 x 10<sup>9</sup>/L
  - Eosinophils >2.0 x 10<sup>9</sup>/L
  - Basophils >0.2 x 10<sup>9</sup>/L
- Instrument flag suggesting abnormal population.

**3. Platelet Abnormalities:**

- Automated platelet count <100 or >800 X 10<sup>9</sup>/L (male or female).
- Abnormal platelet histogram or flag, requiring verification.

**Children**

- If relevant parameters fall outside reference intervals for age and sex.
- Abnormal RBC histogram or instrument flag requiring verification.
- Instrument flag suggesting abnormal WBC population.
- Abnormal platelet histogram or instrument flag requiring verification.

**NOTES:** *These add-on criteria apply to new findings only. For patients with known abnormalities, e.g.: kidney failure, blood film review could be added on and billed if there is a significant change; e.g.: Hemoglobin change >20 g/L and outside the reference interval MCV change >5 fL and outside the reference interval.*

**NOTES:** *Laboratories should investigate the rationale for the change prior to adding the test, if it occurred within 7 days of the previous result, for example, the change may be due to a recent blood transfusion post-child birth.*

90480**	Red cell fragility - incubated.....	57.13
90490	Reticulocyte count and/or Heinz bodies.....	11.54

**Reticulocyte Count**

When a reticulocyte count is requested, the Hematology Profile (90205), in addition to the reticulocyte count (**90490**), may be performed and billed.

90505**	Ristocetin co-factor assay.....	77.57
---------	---------------------------------	-------

90512	Secretion smear for eosinophils .....	7.41
90515	Sedimentation rate .....	10.61
	<b>Notes:</b>	
	<i>i) Not payable if requested with 91300 (C – Reactive Protein) for adults aged 19 or above.</i>	
	<i>ii) Not payable unless an acceptable indication is written on the requisition by the referring practitioner.</i>	
	<i>iii) Refer to GPAC <a href="#">guideline</a> “C-Reactive Protein and Erythrocyte Sedimentation Rate Testing” for additional information.</i>	
90525	Sickle cell identification.....	76.41
90540**	Thalassemia/hemoglobinopathy investigation.....	65.46
	<b>Notes:</b>	
	<i>i) 90540 includes 90465 and 90205, and 90240 (utilizing an electrophoretic or chromatographic separation technique for the detection and quantification of normal and variant hemoglobins including Hemoglobin A2 and Hemoglobin F.</i>	
	<i>ii) In selected cases, 90240 may be billed in addition to 90540, where further electrophoreses (e.g.: citrate agar and/or isoelectric focusing) are required as diagnostic and/or confirmatory tests.</i>	
	<i>iii) Not payable with 90220 (Hemoglobin A2) or 90175 (Fetal Hemoglobin).</i>	
90545	Thrombin time.....	8.31
90555**	Von Willebrand factor antigen .....	107.66

**SCHEDULE OF FEES**

For the Laboratory Services Outpatient

**PAYMENT SCHEDULE**

<b>Section Two</b>	<b>Microbiology Fee Items</b>	<b>Issued: October 1, 2015</b>
--------------------	-------------------------------	--------------------------------

**MICROBIOLOGY FEE ITEMS**

The Microbiology Double Asterisk (\*\*) fee items may require review/interpretation or a written report on a proportion of cases. The specific interaction as well as the proportion is a function of the request, the source of the specimen, the methodology utilized, the result, and the clinical context.

The list below has been developed as a guide to when intervention by a Laboratory Medicine/ Medical Microbiologist physician is indicated.

<b>Fee Codes</b>	<b>Name of Test</b>	<b>Laboratory Medicine physician intervention is required in the following circumstances</b>
90600	Acid fast organisms – culture	All positive cultures for Mycobacterium species
90605	Anaerobic culture investigation	All culture positive for C. Perfringens or C.tetani
90615	Antibiotic susceptibility test	S. Aureus resistant to Oxacillin screening test. Enterococci resistant to Vancomycin or high level amino-glycosides, or Ampicillin. S. Pneumoniae resistant to Oxacillin screen. (For out-patients, organisms resistant to all oral antibiotics tested.)
90625	Blood culture	Positive blood cultures Positive Gram stains from blood cultures.
90665	Fungus culture	Positive for significant fungus species as defined by clinically accepted criteria
90720	Routine culture	Positive cultures from normally sterile body fluids. Positive cultures for “reportable” communicable organisms.
90775	Throat or nose culture	Request for, or positive culture for C.diphtheriae
90780	Additional throat/nose culture	Request for, or positive culture for C.diphtheriae

**Note:** The table above does not preclude laboratory specialty follow-up as required in all other circumstances.

	<b>Total Fee \$</b>
90600**	Acid fast organisms - culture .....24.13
90605**	Anaerobic culture investigation.....11.77
	<i>Note: This fee may be additional to 90720.</i>
90615**	Antibiotic susceptibility test: semi-quantitative per organism. ....11.61
	<b>Notes:</b>
	i) <i>To a maximum of three for urine, and two for nose/throat.</i>
	ii) <i>Test to be performed on pure culture</i>
90620	Biochemical identification of micro-organism - per organism, non-stool.....9.55
	<i>Note: The number of combined identifications payable per specimen by biochemical (90620), MALDI-TOF-MS (90752) is limited to a maximum of three for urine, and two for nose/throat</i>
90625**	Blood culture, using aerobic and/or anaerobic media .....36.08
90630	C. difficile toxin, immunological method .....16.64
	<i>Note: 90630 not to be performed on formed stool and not billable with P90656 or P90811.</i>
90640	Candida culture .....6.81
90647	Trichomonas vaginalis (TV) detection by NAAT – urine or swab.....40.08
	<b>Notes:</b>
	i) <i>Not payable with 90648 GC/CT detection by NAAT – urine or swab</i>
	ii) <i>Not payable with 90649 GC/CT/TV detection by NAAT – urine or swab</i>
	iii) <i>TV detection by NAAT (90647 and 90649), should not be used for general screening. The test should only be performed on symptomatic individuals and those in high risk groups.</i>
	iv) <i>If two or more specimens are submitted on the same day, laboratory medicine physician approval for testing both is required.</i>
90648	Gonorrhea/Chlamydia trachomatis (GC/CT) detection by NAAT – urine or swab .....16.36
	<b>Notes:</b>
	i) <i>Not payable with 90647 TV detection by NAAT</i>
	ii) <i>If four or more specimens are submitted on the same day, laboratory medicine physician approval for testing is required.</i>
90649	Gonorrhea/Chlamydia trachomatis/Trichomonas vaginalis (GC/CT/TV) detection by NAAT – urine or swab .....19.90
	<b>Notes:</b>
	i) <i>Not payable with 90647 TV detection by NAAT</i>
	ii) <i>If two or more specimens are submitted on the same day, laboratory medicine physician approval for testing both is required.</i>
	iii) <i>TV detection by NAAT (90647 and 90649), should not be used for general screening. The test should only be performed on symptomatic individuals and those in high risk groups.</i>
P90656	C. difficile toxin, real time PCR.....48.91
	<b>Notes:</b>
	i) <i>Not billable with 90630 or P90811.</i>
	ii) <i>Paid in addition to stool culture (90745), serological identification of microorganisms (90725), biochemical identification of microorganisms (90750), molecular identification of stool isolate (90751), and MALDI-TOF-MS (90753).</i>
90665**	Fungus culture .....21.41
90670	Fungus, direct examination KOH preparation .....13.76
90675	Hepatitis B e antigen .....14.87
	<i>Note: 90675 only to be performed if HBsAg is positive</i>
90685	Hepatitis A - IgM antibody (anti-HAV-IgM) .....18.42
90690	Hepatitis B core antibody (anti-HBc) .....10.85
90700	Hepatitis B surface antibody (anti-HBs) .....11.08
91765	Hepatitis B surface antigen.....10.40
90715	Rotavirus antigen.....16.87
	<b>Note:</b>
	i) <i>90715 restricted to Category III laboratories having a consultant medical microbiologist.</i>

	ii) Not billable with P90811.	
90720**	Routine culture .....	15.30
	<b>Note:</b> 90720 not billable for virus isolation.	
90725	Serological identification of bacterial micro-organism .....	15.94
	<b>Notes:</b>	
	i) 90725 applies to colonial isolates only.	
	ii) When billing multiple 90725 on same specimen, provide note record indicating suspected pathogens.	
	iii) Not billable with P90811.	
90736**	Cervical culture .....	15.44
90737**	Vaginal culture .....	15.40
90738**	Urethral culture .....	21.17
90739**	Combined vagino-anorectal or vaginal culture for Group B Streptococcus only .....	15.40
	<b>Note:</b> Rectal specimens for pregnancy and/or GBS, bill under 90745.	
90740	Stained smear.....	16.71
	<b>Notes:</b>	
	i) Only in exceptional circumstances will a Gram stain be charged for a throat, nose or urine culture specimen.	
	ii) 90740 is applicable to acid fast smear of stool for Mycobacterium avium-intracellulare, if specifically requested.	
90741**	Genital culture – other site.....	25.28
	<b>Notes:</b>	
	i) Applicable to specimens from penis, introitus, vulva, Bartholin's cysts or non-childbearing age vagina.	
	ii) Specimens from age groups or situations not noted in i) should be billed under other medically appropriate codes.	
90745	Stool culture.....	16.90
	<b>Note:</b>	
	i) Campylobacter identification is a mandatory part of stool bacteriological studies. Only biochemical identification of micro-organism in stool (90750), molecular identification of stool isolates (90751), MALDI-TOF-MS (90753), antibiotic susceptibility test (90615) and/or serological identification of bacterial micro-organisms (90725) are payable with stool culture (90745), and only so when indicated based on stool culture findings and current practice standards.	
	ii) Not billable with P90811.	
90750	Biochemical identification of micro-organism in stool.....	14.42
	<b>Note:</b>	
	i) The number of combined identifications payable per stool specimen by biochemical (90750), molecular (90751), and MALDI-TOF-MS (90753) techniques is limited to a maximum of six.	
	ii) Not billable with P90811.	
P90751	Molecular identification, stool isolate .....	14.90
	<b>Note:</b>	
	i) The number of combined identifications payable per stool specimen by biochemical (90750), molecular (90751), and MALDI-TOF-MS (90753) techniques is limited to a maximum of six.	
	ii) Not billable with P90811.	
P90752	Identification of microorganisms via MALDI-TOF-MS, in non-stool specimen.....	6.84
	<b>Note:</b> The number of combined identifications payable per specimen by biochemical (90620), and MALDI-TOF-MS (90752) is limited to a maximum of three for urine, and two for nose/throat.	
P90753	Identification of microorganisms via MALDI-TOF-MS, in stool specimen. ....	6.84
	<b>Note:</b>	
	i) The number of combined identifications payable per stool specimen by biochemical (90750), molecular (90751), and MALDI-TOF-MS (90753) is limited to a maximum of six.	
	ii) Not billable with P90811.	
90755	Streptococcal enzyme slide test.....	12.52
90760*	Streptococci - rapid test.....	13.02
	<b>Note:</b> Item 90760 is not billable with 90775 or 90780.	
90765	Anti-streptolysin "O" titre.....	11.73
90775**	Throat or nose culture .....	18.18

90780**	Throat or nose culture - each additional culture .....	18.18
90785	Candida, direct examination .....	11.63
90790	Urine colony count culture .....	19.57

**Ova and Parasites Fee Items**

90795	Pinworm Ova - Examination .....	43.94
90800	Stool examination, concentration methods .....	46.93
	<i>i) 90800 not billable with 90805 and P90811.</i>	
	<i>ii) 90800 testing restricted to recent (within 6 months) immigrants, refugees, and travelers from low to middle income countries, and severely immunocompromised patients.</i>	
90805	Macroscopic examination of parasite and/or direct microscopic examination .....	42.96
	<b>Notes:</b>	
	<i>i) Applicable to scabies, lice, ticks, worms.</i>	
	<i>ii) 90800 not to be billed with 90805.</i>	
90810	Stool examination, search for amoebae and/or permanent stain smear .....	46.93
	<i>i) 90800 not billable with 90805 and P90811.</i>	
	<i>ii) 90800 testing restricted to recent (within 6 months) immigrants, refugees, and travelers from low to middle income countries, and severely immunocompromised patients.</i>	
P90811	Infectious Diarrhea Panel (IDP).....	105.04
	<b>Notes:</b>	
	<i>i) P90811 not payable with: 90630, P90656, 90715, 90725, 90745, 90750, P90751, P90753, 90800 &amp; 90810.</i>	
	<i>ii) Only billable once per 7-day period.</i>	

**SCHEDULE OF FEES**

For the Laboratory Services Outpatient

**PAYMENT SCHEDULE**

<b>Section Three</b>	<b>Chemistry Fee Items</b>	<b>Issued: October 1, 2015</b>
----------------------	----------------------------	--------------------------------

**CHEMISTRY FEE ITEMS**

	<b>Total Fee \$</b>
<b>Base Fees:</b>	
<b>Notes: (These Notes apply to 91000, 91005 and 91010)</b>	
i) 91000 is only applicable to tests requested from the "panel" listed below and are performed in the same facility or within the same laboratory accessioning system;	
ii) 91005 and 91010 are applicable to the collecting and the referral facilities when the initial facility performs only a portion of the tests requested and refers the remainder to a different facility or a different laboratory accessioning system;	
iii) 91005 and 91010 are not applicable to further referrals to additional facilities;	
iv) The base fee should be billed only with 91040, 91042, 91065, 91070, 91210, 91235, 91245, 91250, 91275, 91326, 91328, 91366, 91368, 91369, 91415, 91420, 91421, 91707, 91709, 91725, 91745, 91900, 91901, 91902, 92070, 92071, 92100, 92102, 92103, 92147, 92148, 92149, 92230, 92231, 92233, 92366, 92368, 92369, 92370, 92375, 92376 and 92377.	
91000 Primary base fee .....	15.62
<b>Note: Not payable with 91690 or 91715</b>	
91005 Split base fee (collecting facility) .....	7.02
91010 Split base fee (referral facility) .....	7.02
91020*** Acetylcholine receptor antibodies - qualitative .....	111.19
91021*** Acetylcholine receptor antibodies - quantitative .....	258.54
91022** Muscle-specific Tyrosine Kinase Antibody (MuSK Ab) .....	310.25
<b>Notes:</b>	
i) Testing is restricted to BC Neuroimmunology Lab.	
ii) Fee item 91022 is only payable when requested by an Ophthalmologist or a Neurologist in BC diagnosing and treating patients suspected of having or confirmed to have Myasthenia Gravis (MG) or other Neuromuscular Junction disorders.	
iii) MuSK Ab test may only be requested following negative samples for fee item 91020 Acetylcholine receptor antibodies – qualitative, or fee item 91021 Acetylcholine receptor antibodies -quantitative.	
iv) Repeat testing in 3- 6 months may be indicated in patients with borderline results, as well as for a confirmed MG patient to monitor treatment response. Repeat testing in negative patients is not indicated.	
91035** ACTH, plasma .....	36.57
91036*** ACTH stimulation test .....	45.24
91037** Acylcarnitine profiling .....	41.28
<b>Note: Restricted to BC Children's Hospital.</b>	
91040 Albumin - serum/plasma .....	1.55
91042 Albumin - transudate/exudate .....	1.06
91050 Alcohol .....	20.79
91060** Aldosterone - plasma .....	170.92
91061** Aldosterone - urine .....	170.92

91065	Alanine aminotransferase (ALT).....	1.47
	<b>Notes:</b>	
	i) Fee item 91065 Alanine aminotransferase (ALT) is the preferred liver function test and is a superior marker of hepatocellular damage compared to the 91210 Aspartate aminotransferase (AST) test.	
	ii) In addition, measurement of AST 91210 in conjunction with ALT 91065 rarely adds clinical value and should not be co-billed, unless clinically indicated.	
91070	Alkaline phosphatase .....	1.57
91075*	Allergen specific IGE assay, per antigen.....	16.13
	<b>Notes:</b>	
	i) The performing laboratory must document that the patient meets the approved indications and supply that information as a billing note record.	
	ii) The standard number of allowable allergen specific 1gE antibodies per 12 month period is 5 per patient.	
	iii) This number can be increased to 10 when further approved by a Laboratory Medicine physician. This will require the addition of the MSP practitioner number of the approving Laboratory Medicine physician to the note record.	
	iv) If the referring physician is a Clinical Immunology & Allergy specialist, the number of allowable tests per 12-month period can exceed the allowable number specified in ii) or iii), up to 20. A note record is required beyond 20.	
91080	Alpha-1 antitrypsin .....	20.06
91090	Alpha fetoglobulin .....	13.03
91095	Alpha fetoprotein .....	24.79
91096**	Alpha-iduronidase, white blood cells .....	51.25
	<b>Note:</b> Restricted to BC Children's Hospital	
91100*	Aluminum.....	49.19
91105**	Amino acids, quantitative (chromatography) .....	78.42
91110**	Amino acids-urine (chromatography) .....	54.27
91115	Ammonia.....	7.41
91125	Amylase - cyst .....	13.73
91126	Amylase - serum/plasma .....	5.27
	<b>Notes:</b>	
	i) 91126 not payable with 91930 (Lipase).	
	ii) Not payable if lipase sent to a referral facility.	
91127	Amylase - transudate/exudate .....	13.66
91135	Androstenedione, plasma .....	36.09
91140	Angiotensin converting enzyme (ACE), analysis in serum.....	18.72
91155*	Antiglomerular basement membrane antibody.....	25.73
91162	Anti-tissue transglutaminase antibodies (anti-TTG), IgA.....	13.92
	<b>Notes:</b>	
	i) Fee includes payment for IgA quantitation when instrument readout suggests IgA deficiency or when 91162 is requested concurrently with 91840 and 91845.	
	ii) Not payable with 91802.	
	iii) Anti-tissue transglutaminase antibodies (anti-TTG), IgA (91162) is ineffective for IgA deficient patients. The IgG anti-deamidated gliadin peptide (anti-DGP) antibodies test (P91163) is the recommended celiac disease test for this patient population.	
	iv) IgG anti-deamidated gliadin peptide (anti-DGP) antibodies (P91163) is the preferred follow up celiac disease test for patients up to 36 months of age.	
P91163	IgG anti-deamidated gliadin peptide (anti-DGP) antibodies .....	18.24
	<b>Notes:</b>	
	i) Use of this test is restricted to the following two patient populations:	
	a. Patients up to 36 months of age, and	
	b. IgA deficient patients.	
	ii) Restricted to referrals from pediatricians and gastroenterologists.	
	iii) Not to be performed on patients with previous or concurrent anti-TTG test that was clearly abnormal.	
	iv) Only to be performed once for diagnostic purposes and should not be repeated for monitoring purposes.	
91165*	Apolipoprotein A-1 .....	20.40
91170	Apolipoprotein B-100 .....	16.60

**Note:** Not payable with 91375, 91780, or 92350 (Lipid profile, full or partial), except in relatively rare cases when it is payable at 50%, provided the referring practitioner has entered the indication (e.g.: "complex dyslipidemia") in the diagnosis portion of the requisition form.

91180***	Apoprotein E genotyping .....	93.90
91185*	Arsenic .....	43.40
91191**	Aryl sulfatase A - white blood cells .....	51.38
91210	Aspartate aminotransferase (AST) .....	1.73

**Notes:**

- i) Fee item 91065 Alanine aminotransferase (ALT) is the preferred liver function test and is a superior marker of hepatocellular damage compared to the 91210 Aspartate aminotransferase (AST) test.
- ii) In addition, measurement of AST 91210 in conjunction with ALT 91065 rarely adds clinical value and should not be co-billed, unless clinically indicated.
- iii) 91210 AST should only be requested to evaluate liver fibrosis or steatohepatitis.

91216**	B-galactosidase - white blood cells .....	51.38
91221**	B-glucosidase- white blood cells .....	51.38
91226	Barbituates - quantitative .....	35.61
91230	Beta-2 - microglobulin .....	20.40
91235	Bicarbonate - serum/plasma .....	2.37
91241***	Bile acids, total .....	32.36

**Notes:**

- i) Payable to a maximum six per patient in the third trimester.
- ii) Restricted to BC Children's Hospital.
- iii) Billing restricted to pregnant patients only.

91245	Bilirubin, total - serum/plasma .....	1.61
91250	Bilirubin, direct .....	1.58
91275	B-type Natriuretic Peptide (BNP or NT-proBNP) .....	28.14

**Notes:**

- v) Payable for assessment of symptomatic patients where the diagnosis of heart failure remains in doubt after standard assessment.
- vi) Repeat testing not payable more than once annually unless requested by the practitioner for new clinical episode suspicious for heart failure or in the tertiary cardiac care outpatient setting for prognostic stratification of heart failure.
- vii) Not payable for repeat testing for monitoring therapy.

91280	C - 1q esterase inhibitors .....	22.86
91285	C - 3 complement .....	9.61
91290	C - 4 complement .....	9.87
91295	C - peptide .....	47.42
91300	C - reactive protein .....	10.31

**Notes:**

- i) For adults aged 19 or above, only 91300 is payable when requested concurrently with 90515 (Sedimentation rate).
- ii) Refer to GPAC [guideline](#) "C-Reactive Protein and Erythrocyte Sedimentation Rate Testing" for additional information.

91305	CA 15-3 .....	21.25
91310	CA 125 .....	22.72
91315	CA 19-9 .....	20.88
91320	Calcitonin .....	50.63
91325	Calcium - timed urine collection .....	5.48
91326	Calcium - total, serum/plasma .....	1.55
91328	Calcium - urine random .....	1.05
91330	Calculus analysis - urine .....	27.86
91335	Carbamazepine .....	15.32
91340	Carbon monoxide, quantitative .....	17.58

**Notes:**

- i) Payable for carboxyhemoglobin determinations utilizing a blood gas analyzer.
- ii) Not payable with 92045.

91345	Carotene .....	8.90
91350**	Catecholamines .....	59.27
91351**	Catecholamines fractions .....	40.79

**Note:** By separation into various types on same patient, same time with interpretation

91352**	Catecholamines - urine.....	46.45
91353	Cell count - examination for feces .....	5.46
91360	Ceruloplasmin.....	10.15
91366	Chloride - serum/plasma .....	1.49
91367	Chloride - timed urine collection .....	10.06
91368	Chloride - urine random.....	3.26
91369	Chloride - whole blood.....	1.06
91370**	Chloride - by iontophoresis - sweat.....	77.50

*Note: A request for **electrolytes** will be interpreted as a request for sodium and potassium only. Assays of **chloride** and bicarbonate will not be performed unless medically justified and specifically requested by a referring practitioner. The minister insures a volume of **chloride** and bicarbonate assays that amounts to no more than approximately 11% of the volume of assays for sodium and potassium.*

91375	Cholesterol, total.....	6.87
91380**	Cholinesterase with dibucaine number .....	30.26
91388***	Chromatography - thin layer (T.L.C.).....	32.65
91390	Complement assay .....	19.63
91395	Complement, total haemolytic (CH 100) .....	43.71
91400	Copper- serum.....	49.19
91401*	Copper- tissue .....	49.77
91402	Copper- urine.....	49.78
91405	Cortisol.....	13.28
91406*	Cortisol, late night salivary test.....	77.25

**Notes:**

- i) Restricted to Vancouver General Hospital.
- ii) Payable only when requested by General Internists, Endocrinologists, Pediatricians and General Surgeons.
- iii) The daily maximum is one per patient.

91415	Creatine kinase (phosphokinase).....	1.88
91420	Creatinine - random urine.....	5.10
<b>Note:</b> Not payable with 91985 (Albumin creatinine ratio (ACR)).		
91421	Creatinine - serum/plasma .....	1.52
91422	Creatinine - timed urine collection .....	5.80
91425	Cryofibrinogen .....	17.38
91430*	Culturing skin fibroblasts for biochemical or DNA analysis .....	603.88
91440	Cryoglobulins .....	41.92
91445	CSF - Albumin .....	20.16
91450	CSF - Immunoglobulin G .....	20.40
91455	Cyclosporine .....	23.47
91460	Dehydroepiandrosterone, serum (DHEA-S).....	18.55
91465	Digoxin.....	18.97

**Drug assay (single):** (Apply to fee items 91482 – 91574)

91482	- Acetaminophen (quantitative).....	11.47
91484	- Amikacin .....	45.99
91494	- Citrate, urine .....	24.66
91498	- Clomipramine .....	49.82
91500	- Clonazepam .....	46.53
91502	- Clozapine.....	27.92
91506	- Desipramine .....	24.35
91508	- Desmethyloclobazam .....	46.53
91510*	- Diazepam .....	46.53
91524	- Gentamycin .....	26.69

91528	- Imipramine .....	46.53
91529*	-Lamotrigine .....	24.64
91538	- Methotrexate.....	46.53
91542	- Methylphenidate .....	46.53
91550	- Nortriptyline .....	24.35
91551*	- Olanzapine .....	24.64
91558	- Propranolol .....	46.53
91559*	- Quetiapine .....	24.64
91561*	- Risperidone .....	26.46
91564	- Tobramycin.....	26.17
91565*	- Topiramate .....	24.64
91572	- Valproic acid.....	16.55
91573	- Vancomycin .....	15.57
91574	- Zopiclone .....	24.64
91599	Drug assay - multiple (2 or more).....	53.46
92550	Urine, Drugs Use Screen – per Analyte – single use kit .....	6.95

**Notes:**

- i) *The above listing is for use in low volume settings only. Laboratories performing tests on greater than 1000 patients per year are expected to use specific listings indicated.*
- ii) *Maximum of 6 analytes per patient per day.*

**Screening Assay Notes (Apply to fee items 92503 – 92513)**

- i) *A maximum of 7 screening assays per patient, per day may be billed.*
- ii) *A request for a 'drug screen' will be interpreted as a request for analysis for methadone/methadone metabolite, opiates, benzodiazepines, cocaine/cocaine metabolite and amphetamines only.*

92503	Amphetamines.....	9.55
92505	Benzodiazepines .....	8.39
92506	Tetrahydrocannabinoids (THC).....	10.92
92507	Cocaine / Cocaine Metabolite.....	7.10
92508	Ethanol.....	6.92
92510	Methadone Metabolite .....	6.80
92511	Opiates .....	7.16
92513	Methadone.....	3.50

**Note:** *Not billable if laboratory has capability of performing methadone metabolite screening test.*

92514	Oxycodone, screening assay .....	12.82
-------	----------------------------------	-------

**Notes:**

- i) *Not paid to facilities that bill 92550.*
- ii) *Only paid for immunoassays labelled specifically for oxycodone testing.*
- iii) *Paid for screening with mass spectrometry or comparable method.*

92518	Fentanyl, urine screening immunoassay .....	13.10
-------	---	-------

**Notes:**

- i) *Only paid for immunoassays labelled specifically for fentanyl testing.*
- ii) *The urine screening immunoassay for fentanyl (92518) is adequate for most clinical situations and requests for confirmatory testing (fee item 92525) will only be considered after a positive screening immunoassay.*

**(1) Confirmatory and Specific Quantitative Assay Testing:**

92515*	Blood Methadone .....	46.42
--------	-----------------------	-------

**Note:** *Up to two specimens payable per day.*

**(2) Confirmatory and Specific Quantitative Assay Testing:**

**Notes:** *Apply to fee items 92520 - 92545*

- i) *Two or more specific quantitative assays from fee items 92520 - 92545 are payable at the rate of the Comprehensive Drug Analysis (fee item 92546). Only one specimen per patient per day is payable;*
- ii) *Applicable only to cases where the presence of the drug would have a significant impact on the management of the patient.*

92520*	1-Amphetamine .....	70.92
--------	---------------------	-------

92521*	1-Metamphetamine.....	70.92
92525*	Fentanyl.....	70.92
	<b>Note:</b> Testing for confirmation (fee item 92525) of positive fentanyl screening assays (fee item 92518) will only be performed and payable following direct consultation with and approval by a Laboratory Medicine physician.	
92527*	Hydrocodone.....	70.92
92528*	Hydromorphone.....	70.92
92529*	Meperidine.....	70.92
92534*	Methylenedioxyamphetamine.....	70.92
92535*	Methylenedioxymethamphetamine.....	70.92
92536*	N-Acetyl Morphine.....	70.92
92538*	Oxycodone, confirmation of a positive screen.....	70.92
92539*	Oxymorphone.....	70.92
92543*	Propoxyphene.....	70.92
92545*	GC/MS Confirmation of Positive Screen.....	67.92
	<b>Note:</b> Payable for confirmatory methods utilizing liquid chromatography mass spectrometry (LC-MS).	
92546	Comprehensive Drug Analysis.....	119.94
	<b>Note:</b> Applicable only if an unknown drug could be the cause of unexplained neurological or psychiatric symptoms and where the presence of the drug would have a significant impact on the management of the patient.	
91600**	Electrophoresis – protein, qualitative.....	26.54
91601**	Electrophoresis – protein, quantitative.....	34.58
	<b>Note:</b> Includes fee item 92148 (Proteins, total, serum or plasma)	
91602**	Electrophoresis - C.S.F.....	31.21
91603**	Electrophoresis - qualitative, urine.....	31.35
91610	Estradiol.....	22.43
91620	Ethosuximide.....	18.47
P91628	Fecal Calprotectin (FC).....	26.00
	<b>Note:</b> Fecal Calprotectin is only payable for patients with an inflammatory bowel disease (IBD) diagnosis.	
91630	Fecal pH.....	3.92
91635	Fecal elastase.....	46.65
	<b>Note:</b> Restricted to BC Children's and Women's Hospital Laboratory	
91636	Fat, fecal – timed collection.....	92.68
91645	Ferritin, serum.....	10.12
91650	Fibrinogen, quantitative, chemical.....	28.68
	<b>Note:</b> 91650 not chargeable for Fibrindex or other non-quantitative methods.	
91660	Follicle stimulating hormone (FSH).....	13.13
91666**	Galactocerebrosidase - white blood cells.....	51.38
91685	Gastrin.....	63.32
91690	Glucose - gestational assessment.....	10.03
	<b>Notes:</b>	
	i) Not payable with 91000 or 91707.	
	ii) For chemical profile tests other than 91707 requested with 91715 or 91690, bill 91005 for the base fee.	
	iii) 91690 is restricted to Category IIC and Category III laboratories.	
91695	Glucose tolerance test - gestational protocol.....	15.84
	<b>Notes:</b>	
	i) Not payable with 91707 (Glucose serum plasma).	
	ii) Limited to one test per pregnancy.	
91700	Glucose semiquantitative.....	3.53
	<b>Note:</b> Dipstick analysed visually or by reflectance meter	
	<b>Glucose quantitative</b>	
91705	Glucose quantitative - CSF.....	6.45
91706	Glucose quantitative - joint fluid.....	6.45
91707	Glucose quantitative - serum/plasma.....	1.46
	<b>Note:</b> Not payable in addition to 91690 or 91715 or 91695.	

91708	Glucose quantitative - transudate/exudate.....	6.45
<b><u>Glucose qualitative</u></b>		
91710	Glucose - timed urine collection .....	7.13
91715	Glucose tolerance test, 2 hours .....	12.94
<b>Notes:</b>		
i) Not payable with 91000 or 91707.		
ii) For chemical profile tests other than 91707 requested with 91715 or 91690, bill 91005 for the base fee.		
91725	Gamma-glutamyl Transferase (GGT).....	1.66
91740	Haptoglobin.....	19.77
91745	Hemoglobin, A1C .....	5.30
<b>Note: 91745 is restricted to Category III laboratories.</b>		
91760	Helicobacter pylori Carbon 13 urea breath test.....	36.50
P91761	Helicobacter pylori stool antigen (HPSA) .....	35.64
91775**	Hexosaminidase - serum.....	51.38
91777**	Hexosaminidase - white blood cells .....	99.30
<b>Note: Restricted to BC Children's Hospital.</b>		
91780	High density lipoproteins cholesterol (HDL cholesterol).....	7.85
91790**	Homovanillic acid (quantitative) urine.....	38.61
91795	Hydroxyindoleacetic acid (5 H.I.A.A.) - urine.....	9.28
91796	Hydroxyindoleacetic acid (5 H.I.A.A.) - quantitative - urine.....	44.28
91802	IgA quantitative - serum/plasma .....	9.83
<b>Note: Not payable with 91162 (Anti-tissue transglutaminase antibodies (anti-TTG), IgA).</b>		
91803	IgG quantitative - spinal fluid.....	20.06
91805	IgF - I (Somatomedin – C).....	55.08
91810*	IgG <sup>1</sup> .....	24.85
91811*	IgG <sup>2</sup> .....	24.85
91812*	IgG <sup>3</sup> .....	24.85
91813*	IgG <sup>4</sup> .....	24.85
91814	IgG blocking antibody.....	20.40
91840	IgG - quantitative .....	9.95
91845	IgM - quantitative.....	10.05
91815*	Immune complex detection by Clq binding method.....	44.66
91820***	Immunofixation - CSF .....	105.31
91821***	Immunofixation - serum/plasma .....	104.12
91822***	Immunofixation - urine .....	104.12
91825	Immunoglobulin D .....	20.40
91835	Immunoreactive trypsin .....	18.80
91855	Insulin, first specimen .....	27.55
91856	Insulin - each additional specimen (same patient and same time) .....	19.49
91857	Insulin - tolerance test, per specimen.....	6.29
91860	Ionized calcium.....	14.02
91861***	Voltage-gated Calcium Channel Antibody (VGCC Ab) .....	454.56
<b>Notes:</b>		
i) Testing is restricted to BC Neuroimmunology Lab.		
ii) Fee item 91861 is only payable when requested by a Neurologist in BC testing patients for Lambert-Eaton Myasthenic Syndrome (LEMS) and in paraneoplastic and non-paraneoplastic cerebellar degeneration.		
iii) Consultation with a Laboratory Medicine physician is required before this test may be requested (a triple asterisk fee item).		
iv) VGCC Ab is a once in a lifetime test.		
91865	Iron, total and binding capacity.....	7.56
<b>Notes:</b>		
i) Laboratories may utilize binding capacity or transferrin to calculate transferrin saturation.		
ii) Not payable with 92345.		
91870**	Isoenzymes by electrophoresis .....	25.53

	<b>Note:</b> <i>Applicable to alkaline phosphatase only.</i>	
91882	Keto acids, chromatography - screening tests - urine .....	5.44
91895	Lactate - serum/plasma .....	7.64
91896	Lactate - whole blood .....	17.89
91900	Lactate dehydrogenase - CSF.....	1.06
91901	Lactate dehydrogenase - serum/plasma .....	1.62
91902	Lactate dehydrogenase - transudate/exudate .....	1.05
91910	Lead .....	130.68
91911	Lead - timed urine collection.....	40.68
91920***	LHRH stimulation test - in addition to specific tests billed.....	46.22
	<b>Notes:</b>	
	i) <i>To be charged only when a written consultative report is submitted.</i>	
	ii) <i>Requires consultation with a Laboratory Medicine physician and written interpretation.</i>	
	iii) <i>Fee includes all time spent with patient including injections or medications given.</i>	
	iv) <i>Not billable with other consultation fees.</i>	
91925***	Light Chains, free kappa and lambda with ratio – quantitative.....	78.99
	<b>Note:</b> <i>Payable for Plasma cell dyscrasias including oligo-secretory or non-secreting myeloma, primary amyloidosis, light-chain only form of myeloma and monoclonal gammopathy of unknown significance.</i>	
91930	Lipase .....	6.62
	<b>Note:</b> <i>Not payable with 91126 (Amylase – serum/plasma).</i>	
91935	Lipoprotein (a).....	29.61
	<b>Note:</b> <i>Should only be performed once in a lifetime.</i>	
91940**	Lipoprotein electrophoresis .....	56.04
	<b>Note:</b> <i>Consultation and approval for 91940 must be documented by the Laboratory Medicine physician in cases of genetically related lipid abnormalities.</i>	
91945	Lithium - serum/plasma .....	14.94
91950	Luteinizing hormone (LH) .....	12.41
91955	Magnesium - fecal .....	25.15
91957	Magnesium - serum/plasma .....	6.79
91958	Magnesium - urine .....	10.06
91965*	Mercury.....	52.42
91975**	Metanephrines, quantitative - 24 hour urine .....	155.77
91985	Albumin creatinine ratio (ACR).....	11.41
	<b>Note:</b> <i>Not payable with 91420 (Creatinine – random urine).</i>	
91990	Microscopic examination of feces.....	5.08
	<b>Note:</b> <i>Includes visual analysis of muscle fibres, fat globules, white cells, etc.</i>	
91992	Mitochondrial preparation – muscle.....	90.55
	<b>Note:</b> <i>Restricted to BC Children’s Hospital.</i>	
91995	Mucopolysaccharides - urine .....	59.55
92001	Nitrogen - 24 hr. excretion – urine .....	6.43
92005	Occult blood - feces .....	6.02
	<b>Note:</b> <i>Applies only to guaiac methods</i>	
92006	Fecal Immunochemical Test (FIT) - For analysis only .....	11.29
	<b>Notes:</b>	
	i) <i>Not paid with 92005.</i>	
	ii) <i>Paid once per screen.</i>	
92007	Fecal Immunochemical Test (FIT) - For sample collection only.....	6.57
	<b>Notes:</b>	
	i) <i>Not paid with 92005.</i>	
	ii) <i>Paid once per screen.</i>	
92010	Organic acids .....	105.41
92015	Osmolar concentration, serum .....	49.25
92016	Osmolar concentration - urine .....	49.41
	<b>Note:</b> <i>Use this listing for concentration test, dilution test and Mosenthal test in urine. Charge number of osmolar concentrations performed.</i>	
92020	Oxalate, timed urine collection .....	58.00
92025	Oxygen, capacity or content (direct gas analysis).....	20.06

92026	Oxygen - saturation (photometric).....	10.93
92030	Parathyroid hormone (intact).....	17.52
92040	Peptide hormones (by R.I.A.).....	25.18
92045	pH, pCO <sub>2</sub> , and pO <sub>2</sub> .....	36.18
92056	Phenylalanine - quantitative.....	20.56
	<i>Note: 92056 is not chargeable for Mann kit method</i>	
92060	Phenytoin, quantitative.....	17.13
92070	Phosphates – random urine.....	2.24
92071	Phosphates - serum/plasma.....	1.62
92072	Phosphates - timed urine collection.....	3.95
92080**	Homocysteine - plasma.....	22.97
92085	Porphobilinogen, qualitative (P.B.G.) - urine.....	9.70
92090	Porphyrins - qualitative, urine.....	7.62
92091	Porphyrins - quantitative with separation - urine.....	56.74
92092	Porphyrins - quantitative with separation - feces.....	132.71
92095**	Porphyrins - quantitative - blood.....	21.76
92100	Potassium - serum/plasma.....	1.39
92101	Potassium - timed urine collection.....	5.57
92102	Potassium - urine random.....	2.84
92103	Potassium - whole blood.....	1.05

*Note (Applies to fee items 92100, 92101, 92102, and 92103): A request for **electrolytes** will be interpreted as a request for sodium and **potassium** only. Assays of chloride and bicarbonate will not be performed unless medically justified and specifically requested by a referring practitioner. The minister insures a volume of chloride and bicarbonate assays that amounts to no more than approximately 11% of the volume of assays for sodium and **potassium**.*

92105	Pre albumin.....	20.16
92108	Pregnancy test, immunologic - urine.....	15.50
	<b>Notes:</b>	
	<i>i) Payable for pregnancy testing utilizing pregnancy test devices approved for professional use, or qualitative hCG methods utilizing automated test systems.</i>	
	<i>ii) Not payable for quantitative hCG testing utilizing automated test systems.</i>	
92110	Pregnancy test - serum.....	14.74
	<b>Notes:</b>	
	<i>i) Payable for pregnancy testing utilizing pregnancy test devices approved for professional use, or qualitative hCG methods utilizing automated test systems.</i>	
	<i>ii) Not payable for quantitative hCG testing utilizing automated test systems.</i>	
92125	Primidone (mysolene).....	18.49
92130	Progesterone, serum/plasma.....	14.86
92131	Progesterone 17-OH, serum/plasma.....	41.71
92135	Prolactin.....	13.49
90710	Prostatic specific antigen (PSA).....	14.35
	<i>Note: This test is not intended for use as a diagnostic screening tool. It is intended only for known or suspected prostate cancer. All screening for PSA is patient pay.</i>	
92145	Proteins - total, quantitative – including CSF.....	7.14
92146	Proteins - timed urine collection.....	5.95
92147	Proteins - total, joint fluid.....	1.05
92148	Proteins - total, serum or plasma.....	1.60
92149	Proteins - total, transudate/exudate.....	1.05
92150	Protease inhibitor typing of alpha 1, antitrypsin deficiency.....	32.95
92151***	Purine, pyrimidine and creatine disorder (PPCD) screen.....	63.34
	<i>Note: Restricted to BC Children's Hospital.</i>	
92152	Pyridinium Cross Links.....	24.67
92155	Pyruvates.....	17.98
92160	Quantitative beta hCG.....	16.30
92165	Quantitative hCG (intact).....	25.18

92170	Quantitative I <sub>g</sub> E assay (performed in duplicate).....	13.72
92185**	Renin - single determination.....	63.87
92190**	Renin - two or more determinations .....	98.11
92195**	Respiratory chain enzymes – muscle.....	274.56
	<b>Notes:</b>	
	i) Includes Complex I, Complex II, Complex IV, citrate synthase.	
	ii) Restricted to BC Children’s Hospital.	
92203	Salicylates, quantitative - serum.....	9.26
92215*	Selenium.....	49.77
92220	Seminal fructose.....	7.32
92225	Serum viscosity .....	23.17
92227	Sirolimus.....	43.01
92230	Sodium - random urine.....	2.72
92231	Sodium - serum/plasma.....	1.38
92232	Sodium - timed urine collection .....	4.60
92233	Sodium - whole blood.....	1.05

Note (Applies to fee items 92230, 92231, 92232, and 92233): A request for **electrolytes** will be interpreted as a request for **sodium** and **potassium** only. Assays of chloride and bicarbonate will not be performed unless medically justified and specifically requested by a referring practitioner. The minister insures a volume of chloride and bicarbonate assays that amounts to no more than approximately 11% of the volume of assays for **sodium** and **potassium**.

92235*	Somatotropin, one specimen.....	30.38
92236*	Somatotropin - each additional specimen .....	19.36
92251**	Sphingomyelinase - white blood cells .....	51.38
92263	Tacrolimus .....	23.47
92266	Testosterone - total.....	15.81

**Note:**

- i) Testosterone, total (TT) should be the first test performed for the assessment of androgen deficiency. Requisitions for calculated bioavailable testosterone or free testosterone will be substituted with a determination of TT + SHBG (if the TT or clinical situation meets the approved criteria for SHBG analysis delineated below).
- ii) Total testosterone ordered for the purposes of monitoring androgen deprivation therapy for prostate cancer, should be referred to a laboratory that performs tandem mass spectrometry with a total allowable error of less than 30% at a total testosterone concentration of 0.7 nmol/L. Alternatively, the laboratory could refer the sample to be measured by an alternate immunoassay methodology that meets this minimum standard. The total allowable error limit of 30% is in comparison to a reference method for testosterone.

92267**	Sex hormone binding globulin (SHBG) .....	13.56
---------	---	-------

**Notes:**

- i) In adult males (>18 yrs.), SHBG should only be performed on patients whose TT lies within the upper half of the subnormal range (approximately 3-8 nmol/L for modern assays).
- ii) SHBG may be ordered for investigation of high total testosterone (approximately 30-35 nmol/L) in men who are not receiving androgen replacement therapy.
- iii) Total testosterone ordered for the purposes of monitoring androgen deprivation therapy for prostate cancer, should be referred to a laboratory that performs tandem mass spectrometry with a total allowable error of less than 30% at a total testosterone concentration of 0.7 nmol/L. Alternatively, the laboratory could refer the sample to be measured by an alternate immunoassay methodology that meets this minimum standard. The total allowable error limit of 30% is in comparison to a reference method for testosterone.

92270*	Thallium .....	43.91
92275	Theophylline .....	42.33
92277	Thiopurine Metabolites .....	50.46

**Notes:**

- i) Only billable by Victoria General Hospital.
- ii) Restricted to referrals from specialists prescribing thiopurine medications.

92278	Thiopurine Methyltransferase .....	54.49
	<b>Notes:</b>	
	i) Should be done on patients prior to starting thiopurine medications	
	ii) Testing is restricted to Surrey Memorial Hospital	
	iii) Should only be performed once in a lifetime	
92280	Thyroglobulin .....	27.90
	<b>Note:</b> Primary use is as a tumor marker for thyroid cancer. Non-neoplastic conditions where thyroglobulin measurement may be useful are thyrotoxicosis factitia, congenital hypothyroidism and inflammatory thyroiditis.	
92285*	Thyroglobulin antibodies.....	20.40
	<b>Note:</b> Thyroglobulin antibodies should only be performed as an adjunct to thyroglobulin measurement for the conditions listed under 92280.	
92305*	Thyroid receptor antibodies .....	22.48
	<b>Note:</b> Requires consultation with laboratory medicine physician.	
	<b><u>Thyroid function tests</u></b>	
92311	T3 - free .....	9.35
92325	Thyroid stimulating hormone (TSH) - any method .....	9.90
92330	Free T4 .....	12.12
	<b>Notes:</b> <i>Thyroid disease tests:</i>	
	i) TSH is the preferred test for the initial investigation of thyroid disease and for monitoring thyroid hormone replacement therapy.	
	ii) For the initial diagnosis of thyroid disease, confirmation of an abnormal TSH with a free T4 is indicated.	
	iii) Refer to GPAC <a href="#">Guideline</a> : "Thyroid Function Tests: Diagnoses and Monitoring of Thyroid Function Disorders in Adults (January 2010)" for other situations and additional information.	
92332	Thyroperoxidase antibodies .....	20.22
	<b>Note:</b> Payable only for possible autoimmune thyroid disease	
92340	Transcobalamine II .....	20.40
92345	Transferrin .....	7.56
	<b>Notes:</b>	
	i) Includes iron, when transferrin saturation requested.	
	ii) Laboratories may utilize binding capacity or transferrin to calculate transferrin saturation.	
	iii) Not payable with 91865 (Iron, total and binding capacity).	
92346**	Transferrin Isoelectric focusing (qualitative).....	90.49
	<b>Note:</b> Restricted to BC Children's Hospital.	
92350	Triglycerides - serum/plasma .....	6.59
92351	Triglycerides - transudate/exudate .....	9.05
92355	Troponin.....	15.05
92366	Urea - CSF.....	1.06
92367	Urea - nitrogen quantitative - urine .....	7.42
92368	Urea - serum/plasma .....	1.57
92369	Urea - urine random .....	1.76
92370	Urea - whole blood .....	1.06
92375	Uric acid - random urine .....	1.06
92376	Uric acid - serum/plasma.....	1.70
92377	Uric acid - synovial fluid.....	1.58
92378	Uric acid - timed urine collection.....	4.56
	<b><u>Urinalysis</u></b>	
92382	Urinalysis - Complete diagnostic, semi-quant and microscopic.....	5.63
92385	Urinalysis - Chemical or any part of (screening) .....	2.05
92390	Urinalysis – Macroscopic	
	<b>Note:</b> To include any/all of dipstick, specific gravity, visual .....	7.42
92391	Urinalysis - Microscopic examination of centrifuged deposit.....	4.19
92395	Urinalysis - Microscopic.....	7.17
	<b>Note:</b> 92395 restricted to Category IIC and Category III laboratories	
92396	Microalbumin, semiquantitative by urine dipstick .....	6.68
92397	Protein creatinine ratio, urine.....	7.67

**Note:** Not paid with 92146, 91985, 91420 or 91422.

92420**	Vanillylmandelic acid (V.M.A.) .....	38.61
92425*	Very long chain fatty acids.....	91.69
92430***	Vitamin A .....	47.86
92435*	Vitamin B1 .....	54.30
92440*	Vitamin B2 .....	54.30
92450	Vitamin B12 .....	14.38
92455**	Vitamin D (1,25 dihydroxy) .....	94.49
92460**	Vitamin D (25 Hydroxy-cholecalciferol) .....	61.32
<b>Notes:</b>		
i) 92460 is not intended for other metabolites of Vitamin D.		
ii) Payable only for beneficiaries under the age of 19 years or when requested by a specialist.		
iii) Refer to GPAC <a href="#">guideline</a> "Vitamin D Testing Protocol" for additional information.		
92465	Vitamin E .....	53.94
92467	White blood cell preparation for lysosomal enzyme testing .....	42.36
<b>Note:</b> Restricted to BC Children's Hospital.		
92470**	Xylose tolerance .....	106.16
92475	Zinc .....	102.44

## SCHEDULE OF FEES

For the Laboratory Services Outpatient

### PAYMENT SCHEDULE

<b>Section Four</b>	<b>Cytogenetics Fee Items</b>	<b>Issued: October 1, 2015</b>
---------------------	-------------------------------	--------------------------------

### CYTOGENETICS FEE ITEMS

		<b>Total Fee \$</b>
93015***	Cytogenetic analysis of short term blood culture (lymphocytes).....	301.44
93020***	Cytogenetic analysis of bone marrow/malignant effusion .....	516.59
93025***	Cytogenetic analysis of chorionic villus sampling.....	727.15
	<i>Note: Not to be billed with 93030 on same day.</i>	
93030**	Cytogenetic analysis of cultured amniotic fluid.....	414.61
93035***	Cytogenetic analysis of cultured tissue (skin, amnion etc.).....	414.49
93040***	Cytogenetic analysis of prenatal fetal blood sample .....	392.46
93045***	Cytogenetic analysis of solid tumours .....	966.29
P93047	Immunoglobulin Heavy Chain Variable Region Somatic Hyper Mutational Status (IGHV-MA) .....	296.18
	<b>Notes:</b>	
	i) Testing is recommended for newly diagnosed chronic lymphocytic leukemia patients	
	ii) Testing is restricted to Vancouver General Hospital's Cytogenetics Laboratory	
	iii) Should only be performed once in a lifetime	
93048	Telomere Length testing for Telomere Biology Disorders (TBDs) 2-panel assay, by flow cytometry – fluorescent in-situ hybridization (Flow-FISH) .....	400.00
	<b>Notes:</b>	
	i) Fee item P93048 is only payable when requested by a Clinical Hematologist or Medical Geneticist.	
	ii) Test approval by a Hematopathologist is required	
	iii) Testing is restricted to patients with clinical and/or laboratory evidence of Telomere Biology Disorders (TBDs) and to genetically-related candidate stem cell donors for patients with identified TBDs	
	iv) The 2-panel assay (P93048) should be performed first, with the use of the 6-panel assay (P93049) limited to cases with inconclusive 2-panel assay results. Further approval by a Hematopathologist is required prior to requesting the 6-panel assay	
	v) Testing is restricted to Repeat Diagnostics Inc.	
93049	Telomere Length testing for Telomere Biology Disorders (TBDs) 6-panel assay, by flow cytometry – fluorescent in-situ hybridization (Flow-FISH) .....	800.00
	<b>Notes:</b>	
	i) Fee item P93049 is only payable when requested by a Clinical Hematologist or Medical Geneticist.	
	ii) Test approval by a Hematopathologist is required	

	iii) Testing is restricted to patients with clinical and/or laboratory evidence of Telomere Biology Disorders (TBDs) and to genetically-related candidate stem cell donors for patients with identified TBDs	
	iv) The 2-panel assay (P93048) should be performed first with the use of the 6-panel assay (P93049) limited to cases with inconclusive 2-panel assay results. Further approval by a Hematopathologist is required prior to requesting the 6-panel assay.	
	v) Testing is restricted to Repeat Diagnostics Inc.	
93050***	Cytogenetic analysis/fluorescence in situ hybridization (FISH), complex .....	466.46
	<b>Note:</b> For cytogenetic evaluation of engraftment in opposite-sex bone marrow transplants, follow-up investigations for leukemia patients with known cancer specific chromosome abnormalities, and rare and complex investigations requiring detailed molecular probing.	
93051	Cytogenetic analysis/fluorescence in situ hybridization (FISH), single probe .....	192.68
	<b>Notes:</b>	
	i) For investigations in which a single molecular probe reagent is used as an adjunct to standard cytogenetic techniques for the detection or interpretation of specific chromosome abnormalities.	
	ii) To a maximum of three services per patient; greater than 3 services requires a note record.	
93053	Cytogenetic analysis/fluorescence in situ hybridization (FISH), uncultured amniotic fluid .....	389.61
	<b>Note:</b>	
	For testing amniotic fluids using a probe set designed for rapid testing of more commonly encountered abnormalities in chromosome number.	
93055	Special staining (Giemsa II, DAPI/SCE, NOR).....	30.78
93060	Special banding (Q-, R-, C-).....	29.48
93065	Amniotic cell culture grown for biochemical analysis only.....	210.20
93070***	Chromosomal breakage studies.....	181.80
93075	Chromosomal mosaicism - investigation.....	114.52
93080	Chromosome analysis – high resolution .....	123.82

**SCHEDULE OF FEES**

For the Laboratory Services Outpatient

**PAYMENT SCHEDULE**

<b>Section Five</b>	<b>Virology Fee Items</b>	<b>Issued: October 1, 2015</b>
---------------------	---------------------------	--------------------------------

**VIROLOGY FEE ITEMS**

		<b>Total Fee \$</b>
90815	Serological tests - 1 to 3 antigens .....	36.83
90820	Serological tests - 4 or more antigens.....	37.98
	<i>Note: Not to be billed for any virology testing where specific listings exist (e.g.: Hepatitis).</i>	
90830	Virus isolation .....	51.65
	<i>Note: Not paid with 90831, 90832 and 90833.</i>	
90831	Hepatitis B virus (HBV) identification by nucleic acid amplification, direct - quantification .....	60.34
	<b>Notes:</b>	
	i) The daily maximum is one.	
	ii) Annual maximum per patient is six.	
	iii) Not paid with 90830.	
	iv) Not intended as a diagnostic screening tool. Use only for the management of patients being treated as per antiviral protocols.	
90832	BK polyoma virus identification by nucleic acid amplification, direct – quantification.....	39.13
	<b>Notes:</b>	
	i) The daily maximum is one.	
	ii) Annual maximum per patient is 30.	
	iii) Not paid with 90830.	
	iv) Not intended as a diagnostic screening tool. Use only for post-transplant management.	
90833	Cytomegalovirus Viral (CMV) identification by nucleic acid amplification, direct – quantification.....	36.92
	<b>Notes:</b>	
	i) The daily maximum is one.	
	ii) Annual maximum per patient is 60.	
	iii) Not paid with 90830.	
	iv) Not intended as a diagnostic screening tool. Use only for post-transplant management.	
90835***	HBV drug resistance mutation analysis.....	129.88
	<b>Notes:</b>	
	i) Annual maximum is two per patient.	
	ii) Paid in addition to 90831.	
P90836	Congenital Cytomegalovirus PCR tests (cCMV).....	30.23
	<b>Notes:</b>	
	i) Testing is restricted to BC Children’s and Woman’s Hospital	
	ii) Testing will be performed on oral swabs from neonates, which must be collected prior to three weeks of age	
	iii) Confirmatory urine testing is required for all positive oral swab samples	
	iv) Criteria for cCMV testing of neonatal saliva samples (saliva swab) by PCR will be consistent with BC Children’s and Woman’s Hospital Diagnosis and Management Guideline for congenital CMV	
P90837	Novel Coronavirus Disease 2019 (COVID-19 or 2019-nCoV) Test .....	26.73

P96293	CUAET HIV Screen.....	23.71
	<b>Notes:</b>	
	i) Only payable for eligible immigrants with appropriate immigration documentation under the Canada-Ukraine Authorization Emergency Travel (CUAET) program.	
	ii) Referring practitioner must be on the list of Panel Physicians approved by Immigration, Refugees and Citizenship Canada (IRCC).	
	iii) Should only be performed once in a lifetime	
	iv) Billing is restricted to the BC Centre of Disease Control Public Health Laboratory	
P96294	CUAET Syphilis Screen.....	20.14
	<b>Notes:</b>	
	i) Only payable for eligible immigrants with appropriate immigration documentation under the Canada-Ukraine Authorization Emergency Travel (CUAET) program.	
	ii) Referring practitioner must be on the list of Panel Physicians approved by Immigration, Refugees and Citizenship Canada (IRCC).	
	iii) Should only be performed once in a lifetime	
	iv) Billing is restricted to the BC Centre of Disease Control Public Health Laboratory	
P96295	CUAET HIV Confirmatory Test.....	118.00
	<b>Notes:</b>	
	i) Only payable for eligible immigrants with appropriate immigration documentation under the Canada-Ukraine Authorization Emergency Travel (CUAET) program.	
	ii) Referring practitioner must be on the list of Panel Physicians approved by Immigration, Refugees and Citizenship Canada (IRCC).	
	iii) Should only be performed once in a lifetime	
	iv) 96295 CUAET HIV Confirmatory Test is only payable after a positive CUAET HIV Screen (96293)	
	v) Billing is restricted to the BC Centre of Disease Control Public Health Laboratory	
P96296	CUAET Syphilis Confirmatory Test.....	21.00
	<b>Notes:</b>	
	i) Only payable for eligible immigrants with appropriate immigration documentation under the Canada-Ukraine Authorization Emergency Travel (CUAET) program.	
	ii) Referring practitioner must be on the list of Panel Physicians approved by Immigration, Refugees and Citizenship Canada (IRCC).	
	iii) Should only be performed once in a lifetime	
	iv) 96296 CUAET Syphilis Confirmatory Test is only payable after a positive CUAET Syphilis Screen (96294)	
	v) Billing is restricted to the BC Centre of Disease Control Public Health Laboratory

<b>Section Six</b>	<b>Anatomic Pathology Fee Items</b>	<b>Issued: October 1, 2015</b>
--------------------	-------------------------------------	--------------------------------

**ANATOMIC PATHOLOGY FEE ITEMS**

	<b>Total Fee \$</b>
93010 Crystal identification, synovial fluid.....	40.05
93085 Cytologic preparation and examination of fine needle aspirate .....	94.24
93090 Cytologic preparation and interpretation of pre-screened, non-gynaecological cytology.....	65.54
93095 Cytologic preparation and interpretation of unscreened, non-gynaecological cytology.....	85.52
93100* Electron microscopy fee .....	384.40
93115 Muscle biopsy enzyme studies.....	195.44

**For the Laboratory Services Outpatient**  
**PAYMENT SCHEDULE**

<b>Section Seven</b>	<b>Other Laboratory Services Fee Items</b>	<b>Issued: October 1, 2015</b>
----------------------	--	--------------------------------

**OTHER FEE ITEMS**

		<b>Total Fee \$</b>
90000	Venepuncture and dispatch of specimen to laboratory, when no other blood work performed.....	7.65
	<b>Notes:</b>	
	i) <i>This is the only fee applicable for taking blood specimens and is to apply in those situations where a single blood work service is provided by a facility or person not associated with the venepuncture.</i>	
	ii) <i>Where a blood specimen is taken by a laboratory and dispatched to another unassociated laboratory, the original laboratory may charge 90000 only when it does not perform another laboratory procedure using blood collected at the same time.</i>	
96292	CUAET Venepuncture and dispatch of specimen to laboratory, when no other blood work performed.....	7.65
	<b>Notes:</b>	
	i) <i>Only payable for eligible immigrants with appropriate immigration documentation under the Canada-Ukraine Authorization Emergency Travel (CUAET) program.</i>	
	ii) <i>Referring practitioner must be on the list of Panel Physicians approved by Immigration, Refugees and Citizenship Canada (IRCC).</i>	
	iii) <i>Where a blood specimen is taken by a laboratory and dispatched to another unassociated laboratory, the original laboratory may charge 96292 only when it does not perform another laboratory procedure using blood collected at the same time.</i>	
<p><i>Note to Operators: The venepuncture and dispatch listings apply only to those situations where this sole service is provided by a facility or person not associated with any other blood work services provided to that patient. Fee item 90000 and 96292 cannot be billed or paid to an operator if any other blood work assays are performed or if the specimen is sent to an associated facility.</i></p>		
93160	Semen, Complete Examination .....	82.34
	<b>Note:</b> <i>Includes total count, motility count, pH, and morphology</i>	
93170	Sperm, seminal examination for presence or absence .....	26.98

94999 Laboratory Medicine Miscellaneous Fee Item.....As adjudicated

Laboratory Medicine miscellaneous fee item 94999 relates to laboratory services not listed in the Payment Schedule that are new medically necessary laboratory services generally considered to be accepted standards of care in the medical community currently and not considered experimental in nature.

*Note to Operators:*

*Claims submitted under miscellaneous fee code 94999 may be accepted for adjudication only if the following criteria are met:*

- 1. a prior estimate of an appropriate fee, with rationale for the level of that fee; and*
- 2. sufficient documentation and pre-approval of the laboratory services to substantiate the claim.*

The minister, or designate, will review the fee estimate proposed and the supporting documentation, and by comparing the service provided with comparable laboratory services listed in the Payment Schedule, and other methods, will determine the level of compensation.
